

AUDIT-07-DUMBASS_VAULT.md

Audit & Extraction Report: Subfolder 7 of ___Lex-Novi-Æxentis-Copiæ (.#_Dumbass-Vault.md)

Scope: #d.u.m.b.a.s.s. Universal Memory Bank, master planning engine (planner.md), and LMPY integration.

Parent Source: ___Lex-Novi-Æxentis-Copiæ/.#_Dumbass-Vault.md
(1ovsEe1CoKd8ERDmHHfZ6Wt8fvXoKb1z3).

Status: All original files preserved 100% untouched.

1. Purpose & System Role: The Universal Memory Bank

#d.u.m.b.a.s.s. (**Database & Universal Memory Bank Across Split Services**) represents the **unbreakable ground truth** of the entire ecosystem:

"It isn't 'dumbass-proof' until it's '#d.u.m.b.a.s.s.' proven."

This folder houses the tri-partite division of memory:

1. **#dumbass.Raw.md**: Sensory inputs and raw asset staging (Tier 1).
 2. **#dumbass.Wiki**: The compounding semantic knowledge graph (Tier 2).
 3. **#dumbass.Agent.md**: Procedural execution directives, data conversion engines, and planning tools (Tier 4).
-

2. Major Discovery: The 140KB Master Planner (planner.md)

Inside **Data_Conversion.md**:

- **planner.md** (File Size: **140.6 KB**):
 - *Significance*: A massive, comprehensive planning and architectural document detailing the complete data conversion pipeline, task execution ladders, and inter-agent communication matrices.
 - *Action*: Codified directly into **02_DUMBASS_UNIVERSAL_MEMORY_SPEC.md** and **00_DEFINITIVE_MASTER_SPECIFICATION_V3_COMPLETE.md**.
-

3. LMPY / NotebookLM-py Library Clarification

- **It's actually called LMPY, `lm.notebooklm.py`, and `.T`:**
 - Clarifies the exact repository and package namespace for the unofficial NotebookLM CLI wrapper (`notebooklm-py` / `lmpy`).
 - Documents the headless Python API used to batch-export Graphify knowledge graphs into audio briefs and synthesized FAQs.
 - *Action*: Enveloped into `skills-and-capabilities/notebook-lmpy/`.
-

4. What Was Combined & What Was Trimmed

- **Fluff Trimmed:** Trimmed short conversational audio notes (`Spot on.txt`, `How should.txt`, `Best.txt`, `How do.txt` [210 bytes]) into actionable planning directives.
- **Combined Specifications:**
 - Synthesized `planner.md` with the 5+1 Cognitive Memory schema in `02_DUMBASS_UNIVERSAL_MEMORY_SPEC.md`, ensuring all data conversion rules operate under zero-trust bounds.
