

Directory Navigation & Ontology Map:

#d.u.m.b.a.s.s.

_dumbass_universal_memory/ [Folder ID: 1t3MBowUk7J_ovll4JvgTtL4z5tinAt60]

|

|— MAP.md # This navigation and ontology map

|— README.md # Subsystem identity, component matrix, and memory laws

|— manifest.jsonl # Streaming machine-readable catalog of all assets

|

|— sqlite/ # On-Device Fast Structured Cache (Node Alpha / Termux)

| |— schema.sql # Canonical local relational and key-value schema

| |— README_SQLITE.md # SQLite configuration and performance guidelines

|

|— postgres/ # Centralized Relational & Vector Memory (Node Beta / Jetson)

| |— migrations_v1.sql # pgvector schemas, audit ledgers, and entity tables

| |— README_POSTGRES.md # Network topology and PostgreSQL access specs

|

|— mem0/ # Live Episodic Habit & Preference Tracking

| |— rolling_habits_schema.json # JSON schema for user habits & syntax rules

| |— mem0_session_config.yaml # Memory decay, scoring, and extraction hooks

|

|— ob1_protocol/ # Open Brain Static Retrieval over MCP

- | └─ ob1_mcp_spec.md # knowledge.retrieve and knowledge.record schemas
- |
- | └─ omniroute/ # Unified Port 20128 Gateway & Compression Engine
- | └─ omniroute_config.yaml # Routing matrix, RTK token compression, and memory tap
- |
- | └─ reasoning_bank/ # Execution State Ledger & RLVR Flywheel
- | | └─ active_execution_paths.json # Active task state recovery ledger
- | └─ recovery_protocol.md # Checkpointing, unwinding, and reward grading
- |
- | └─ continual_harness/ # Reset-Free Online Adaptation Engine
- | └─ continual_harness_policy.md # Prompt refinement rules and snapshot rollbacks
